

DHUP THUMBADIYA

Gandhinagar – 382007 · +91 78619 86355 · dhupthumbadiya2005@gmail.com · LinkedIn

Skills

Languages & Frontend: Java, JavaScript, Python, SQL, TypeScript, React.js

Backend & Databases: FastAPI, Node.js, Express.js, Next.js, REST APIs, MongoDB, MySQL, PostgreSQL

AI Stack: Voice Agent Pipelines (Pipecat), STT/TTS (Deepgram, ElevenLabs, Cartesia), OpenAI, Groq, RAG Pipelines

Tools & DevOps: Git, Docker, Vercel, AWS (EC2, S3), Oracle VM, Twilio

Experience

AI Backend Engineer Intern

May 2026 – July 2026

WotNot Solutions Pvt. Ltd.

- Engineered a real-time voice agent pipeline using **Pipecat**, achieving sub-700ms response latency.
- Integrated multi-modal STT/TTS services (Deepgram, ElevenLabs, Cartesia) with **OpenAI LLMs** and RAG knowledge bases for low-latency interactions.
- Deployed and optimized full-stack voice solutions on **Oracle VM**, supporting multi-channel access via Web and Call (Twilio).
- Architected a specialized **RAG pipeline** for an e-commerce platform enabling intelligent product retrieval via natural language.

Full Stack Developer Intern

Nov 2024 – Feb 2025

PDEU IIC (INavLabs)

- Built a full-stack web app using **Next.js** and **FastAPI** with 5+ REST APIs; designed database schema and implemented CRUD operations.
- Tested and validated APIs using Postman; collaborated with team for backend integration and database design.

Projects

EZReview.in | *Next.js 14, TypeScript, PostgreSQL, OpenAI GPT-4o-mini, Razorpay, Prisma, Vercel* | [Live](#)

- Built a multi-tenant SaaS where businesses get a QR code; customers answer an **AI-generated survey** and receive a ready-to-post Google review in 4 styles including Hinglish.
- SaaS features include Google OAuth, admin panel, **subscription billing** with 3 plans, invoice downloads, usage analytics, and QR print card generation.
- Streamed OpenAI responses via **Vercel Edge Runtime** cutting wait time from 6s to under 2s.

CrediSphere – AI-Powered Credit Risk Platform | *React, Node.js, Flask, Supabase, XGBoost* | **3rd @ Breach 2025**

- Built a multi-bureau credit risk platform that aggregates data from multiple bureaus into a **unified risk score** using an XGBoost model.
- Added fault-tolerant logic to maintain functionality during bureau API failures; built an **AI-powered chatbot** for PDF-based financial Q&A.

DevGhost – AI Git Commit Generator | *Python, Gemini AI, PyPI* | [GitHub](#) | [Medium](#)

- Developed a cross-platform **CLI tool** that generates AI-powered Git commit messages by analyzing staged diffs via Gemini AI prompt engineering.
- Published on **PyPI** (`pip install devghost`) with secure API key integration for seamless developer workflow.

HydroGenMaps – GIS Infrastructure Platform | *React, D3.js, Mapbox, FastAPI, PostgreSQL, XGBoost*

- Developed an interactive **GIS platform** to visualize hydrogen assets (plants, pipelines, storage) with region-based infrastructure analysis.
- Implemented **AI-driven site scoring** across 20+ factors using XGBoost and LLMs (Mistral-7B via Groq) to support data-driven infrastructure planning.

Education

Pandit Deendayal Energy University, Gandhinagar

B.Tech in Information and Communication Technology

2023 – 2027

CGPA: 9.09/10

Hackathons & Certifications

- Breach 2025** (Fintech): Secured **3rd Place** in Gujarat's largest fintech hackathon.
- Smart India Hackathon (SIH)**, PDEU: Ranked among the top 25 university teams.
- Hackout'2025** (DAIICT): Qualified for the final round.
- VidhyutAI** (IIT Gandhinagar): Selected as a **Top 10 Finalist** team.
- Coral AI Agent Hackathon** (Solo): Engineered an AI-driven DevOps automation agent.
- Java Programming Certification** (Udemy).
